Alderman Margaret Laurino, 39th Ward  
4404 W. Lawrence  
Chicago, IL 60630

May 21, 2018

Alderman Laurino:

On behalf of concerned residents of the North Park neighborhood, I am writing to relay a summary of opinions expressed in a community meeting on Tuesday, May 15, about the proposed zoning change at 5301 N. Kedzie.

As you know, the property in question falls within the 40th ward, but the residential areas affected by the potential new development are in the 39th Ward. Participants in the meeting seemed to feel strongly that, given the nature of the ward boundaries and the location of the project, you and Alderman O'Connor should work together to ensure that neighborhood voices are heard, especially since you hold a seat on the Committee on Zoning, Landmarks, and Building Standards. Several residents asked about what communication and collaboration the two of you have shared on this topic.

Residents' appraisals of the proposed project were consistently critical. Major concerns include the height of the building, which is expected to be 10 feet taller than the 3-story condominium directly across the street; the incongruence with neighborhood character; the fact that the zoning designation of B3-5 is exceedingly uncommon in our area; the lack of green space and other environmental improvements; and the lack of neighborhood interest in the particular business model of self-storage.

A more significant undercurrent to much of the criticism was not about what the project is; rather, the objection is about what the project is not. Residents expressed a concern that the project does not appear to be a result of a forward-looking development strategy for the Kedzie corridor. Residents wanted to know from Aldermen O'Connor and Laurino how to help craft a development vision for Kedzie. In light of the anticipated economic development study of the neighborhood to be completed by the Department of Planning, residents expressed a desire to work with you to create a proactive vision for development that North Park residents can embrace.

The Hollywood-North Park Community Association is committed to participating in such a community conversation, and we look forward to being in touch about shaping neighborhood development that residents support.

Sincerely,

Andrew Johnson
